Our PIW custom cables are designed & manufactured according to specific needs of our customers' applications. Due of this, it has become an integral part of the system & its performance. The advantages of our custom cable as a manufacturer include being able to:

- Save money by specifying the exact quantity & lengths required.
- Identifying the physical and electrical tolerances.
- Define the components (jacket, shield, insulation, shield, etc.) that best fit your application.

- Optimizing the conductor stranding, size, and color-code.
- Brand recognition by printing your company's logo and information on the jacket.

Basic information need for customizing your cable is as per below:

Conductor Information

Conductor Size:

Conductor Material:

Thermocouple Type:

Insulation Information

Material Type:

Insulation Thickness:

Cable Description

No. of Conductors:

No. of Pairs:

No of Triads:

No of Quads:

Shield Information

Shield Type:

Jacket Information

Material Type:

Color:

Jacket Thickness:

Max OD:

Additional Info

Overbraid:

Temperature Rating:

Voltage Rating:

Quantity (meter):

or Provide detail Drawing/File Attachment
